Big Shots® are double barrel confetti cannons which provide a one time “blast” of confetti or streamers. They shoot streamers of all sizes up to 80 feet (or higher depending on the pressure setting and size of streamer) and confetti up to 50 feet in the air. They can be mounted on the ground level or from a truss/ledge to achieve different effects. The Big Shots® use “sleeves” of confetti or streamers. Each barrel holds two sleeves (4 sleeves per cannon/per shot) and they can be mixed — one sleeve of confetti and one sleeve of streamers for various looks. Big Shots® are remotely actuated using a multiple cue control unit. They can be daisy chained together (more than 100) and fired on the same or separate cues to achieve the desired effect. They provide

The solenoid/valve is actuated by electronic input from a 110 VAC power source (can be modified to a 220 VAC, 24 VDC or a 12 VDC power source). The solenoid actuation requires approximately 20 watts each. The Big Shots® can be operated from a lighting board on a non-dim circuit.

Big Shots® sell for \$1,150.00 each.
