

Silent Storm™

Silent Storm™

Silent Storm™ Confetti Spreaders; Touring (t) and Small Shippable (ss)

The Silent Storm™ Confetti Spreaders provide a continuous flow of confetti at the desired rate over the selected time frame WITHOUT operator attention. The units are whisper quiet and have a variable speed blower enabling the user to “dial in” the desired flow/effect. With a load capacity of 10–20 pounds depending on the model and materials, the Silent Storm™ can deliver a sustained effect, quietly and effortlessly, for up to 10 minutes, or more. The Silent Storm™ can be rigged to ducting to deliver the effect in precisely the desired location. Whether mounted in a grid or rigged to a truss, the Silent Storm™ provides a steady fall of confetti to match any artistic intent. The Silent Storm™ runs on 110 VAC power (220 VAC available) and is fully operational through a lighting board dimmer circuit. The Silent Storm™ propels confetti, not streamers.

There are primarily two differences between the Touring (t) version and the Small Shippable (ss) version of the Silent Storm™ Confetti Spreaders—load capacity and design intent. The “t” version is designed to ship on a tour, and reduces setup time for a tour crew. The “ss” version is designed to meet the size/weight requirements of UPS and correspondingly help manage shipping costs.

Pricing

The Silent Storm™ Confetti Spreaders (“t” and “ss”) sell for \$3,250.00 each. When you purchase a Silent Storm™ Confetti Spreader from Artistry In Motion, Inc. you receive a 25% discount on confetti orders up to \$1,000.00 (\$250.00 discount) when the confetti order is placed concurrently with your Silent Storm™ order. Alternatively, the rental rate for either version is \$250.00/day. Long term rental rates are available. Shipping costs are additional.
