

▲ Silent Storm DMX Snow Machine (w/ Variable Flow Remote)

Picture this - you have spent weeks preparing for that tranquil scene in your production, where snow falls gently on a dark winter’s night. The actors enter stage left; scenery and lighting has your audience captivated as they hang on the Heroin’s every word. The stage manager signals for a light dusting of snow and; along with a perfect finish to a visually convincing winter’s night, comes the sound of a jet engine - otherwise known as your snow machine.

Solution: The Silent Storm

Le Maitre’s Silent Storm is a remarkably quiet snow machine with built-in 2-channel DMX for both fan speed and flow control. It boasts 70% more output than its predecessor and is taking the snow machine market by storm (silently we might add).

The Silent Storm comes with our standard One-Year Warranty on all parts and service.

▲ Output:

Reheat Time:	None
Fluid Consumption:	TBA ----- Run Time: Continuous

▲ Specifications:
